SUMMARY

Final-year Software Engineering student passionate about developing user-centered web and mobile applications and solving real-world problems through technology. Experienced in building a web-based educational recommendation platform, UniWise, from requirements analysis and database design to full-stack implementation and testing. Familiar with software development methodologies, RESTful API architecture, software QA, and technical documentation. Eager to contribute technical skills, adaptability, and continuous learning to a dynamic software development team.

EDUCATION

University Pendidikan Sultan Idris — **OCTOBER 2023 - OCTOBER 2027**

Bachelor of Software Engineering (Education Software) with honours

CGPA: 3.47 / 4.00

KOLEJ POLY-TECH MARA — **JULY 2020 - NOVEMBER 2022**

Diploma in Multimedia

CGPA: 3.90 / 4.00

WORK EXPERIENCE

INTERNSHIP

Pusat Pengetahuan, Komunikasi & Teknologi (PPKT), Universiti Sains Malaysia (USM)

- Designed digital festive posters and marketing collateral for departmental social channels and internal communications, maintaining official institutional branding standards.
- Developed interactive e-magazine layouts, managing page structuring, typography, and visual assets for digital publication.
- Assisted in IT infrastructure setup and PC deployment across lecture halls, including workstation configuration, software installations, and hardware verification.
- Participated in hands-on web development training using Mobirise, building foundational skills in responsive website structure and rapid prototyping.
- Collaborated with IT officers to support daily technical operations, lecture hall multimedia readiness, and ad-hoc digital requests.

PROJECT

UniWise – Final Year Project | Web-Based Educational Recommendation System & IMS **ONGOING**

Description: Architected a web-based educational recommendation and information management system to facilitate undergraduate programme selection for secondary school leavers. The platform leverages a rule-based matching engine, psychometric profiling, and academic merit calculation to maximize programme matching accuracy and streamline the decision-making process.

Currently developing UniWise, a responsive web-based educational recommendation platform and centralized Information Management System (IMS) designed to guide secondary school graduates in choosing optimal tertiary academic pathways. The platform integrates a multi-criteria recommendation mechanism incorporating specific academic entry requirements, a standardized 90/10 academic and co-curricular merit calculation formula, and a 60-question RIASEC psychometric assessment to evaluate student suitability. I engineered the full-stack architecture using a decoupled 3-tier design with Laravel as the RESTful API backend, React.js and Tailwind CSS for the frontend, and MySQL for the database layer, ensuring secure session management via Laravel Sanctum alongside role-based access control for Students and Administrators. Managing the software development lifecycle from requirements gathering to system evaluation, I produced comprehensive software engineering documentation for the project, which includes Software Requirements Specifications (SRS), database schema designs, and formal software quality assurance testing protocols.

AWARDS AND ACHIEVEMENT

National Participant (UPSI Representative) | Japanese Skit Contest 2024 (JFKL)

EXTRACURICULLAR ACTIVITIES

Welfare & Development Executive Committee Member | Special Needs Student Club (I-MPUC) (2024 – 2025)

Volunteer Participant | Sentuhan Kasih Bitara: Surau Khairiah Cleaning Initiative, Taman Hijau, Tanjong Malim (28 May 2025)

Technical Committee Member | OUTREACH: MyKESUMA Jobs Career LaunchPad OKU, (24 June 2025)

Technical Committee Member | Webinar: Buddy System in Higher Education (24 January 2025)

Logistics & Event Committee Member | Valorant E-Sports Championship: ELITE BATTLE LEAGUE S2 (8 November 2024)

Transportation & Registration Committee Member | SULAM CoMaSPro'24, FKMT & UCTC (8 January 2024)

Volunteer Participant | Teluk Senangin Beach Cleanup (22 June 2022)

SKILLS

Software, IDE & Tools: Git/GitHub, VS Code, Laragon, XAMPP, MySQL, Supabase, Jira, Blender, Figma, Canva, Capcut, Adobe Photoshop, Adobe Illustrator, Adobe Premiere Pro, Adobe Animate, OBS Studio, Roblox Studio, Microsoft Office Suite, Generative AI (Gemini, ChatGPT, Copilot, Claude)

Programming Languages: PHP, JavaScript, Python, Java, C#, C++, Dart, SQL, HTML5, CSS3

Development & Frameworks: Full-Stack Web & Mobile Development, Laravel, React.js, Node.js, Flutter, Tailwind CSS, RESTful API Architecture, Object-Oriented Programming (OOP), AI-Assisted Development

Language: Malay (Native), English (Advanced), Japanese (Intermediate)

Others / Competencies: AI Prompt Engineering, Local LLM Integration (Ollama), Software Requirements Specification (SRS), Software Quality Assurance & Testing, 3D Modeling, Technical Documentation
